PATTERSON DENTAL PRESENTS CEREC® 4.0

FRIDAY, OCTOBER 28, 2011

CEREC® 4.0 is a comprehensive upgrade of the CEREC® software platform, launching the CEREC® system forward with powerful new features to make CEREC® more productive in your practice than ever.

Outstanding features of CEREC® 4.0 include:

- **Multiple restoration design** – Work on as many different restorations as you wish, even in different quadrants and arches
- **Work directly on the tooth** – Execute design tools directly on the tooth, such as adding or removing material, rotating or positioning, or expanding or reducing tooth size
- **Streamlined restoration design** – Move backward and forward without undoing previous design steps

Join CEREC® expert Richard Rosenblatt for a guided tour through the most exciting development yet in CAD/CAM restorative dentistry.

Speaker: Richard Rosenblatt, DMD

Dr. Rich Rosenblatt has been practicing in the Chicago area since 1999 and presently owns a dental practice in Lake Forest, Ill. A CEREC user since 2003, Dr. Rosenblatt created the Northern Illinois CEREC Study Club, the largest CAD/CAM study club in the U.S. He is a software beta tester and a certified speaker for Sirona Dental Systems and also a CEREC basic trainer for Patterson Dental. He is a faculty member on the ceredoctors.com website, a faculty mentor at the Scottsdale Center for Dentistry in the CAD/CAM division and a moderator for the CEREC forum on Dentaltown.com.

RSVP TODAY!

Seating is limited
and will go quickly.
