

PATTERSON DENTAL PRESENTS

# CEREC® 4.0!

FRIDAY, NOVEMBER 4, 2011

CEREC 4.0 is a comprehensive upgrade of the CEREC software platform, launching the CEREC system forward with powerful new features to make CEREC more productive in your practice than ever.

## Outstanding features of CEREC® 4.0 include:

- **Multiple restoration design** – Work on as many different restorations as you wish, even in different quadrants and arches
- **Work directly on the tooth** – Execute design tools directly on the tooth, such as adding or removing material, rotating or positioning, or expanding or reducing tooth size
- **Streamlined restoration design** – Move backward and forward without undoing previous design steps

Join CEREC expert Dr. Dzon M. Nguyen for a guided tour through the most exciting development yet in CAD/CAM restorative dentistry.

## Speaker: Dzon M. Nguyen, DDS, FAGD

Dr. Dzon M. Nguyen graduated from the University of Maryland at Baltimore, School of Dental Surgery and obtained his Fellowship in the Academy of General Dentistry. He maintains three private practices in Issaquah, Renton and Seattle, Wash., where he places an emphasis on CEREC CAD/CAM restoration, dental implant surgery and restoration, and Invisalign orthodontics. Dr. Nguyen is both a Sirona CEREC beta software tester and an instructor with Patterson Dental for certifying new doctors. He is co-founder of the CEREC Advanced Learning Center in Seattle, where he teaches intermediate and advanced courses.
