

PATTERSON DENTAL PRESENTS
CEREC® 4.0!
FRIDAY, OCTOBER 21, 2011

CEREC® 4.0 is a comprehensive upgrade of the CEREC® software platform, launching the CEREC® system forward with powerful new features to make CEREC® more productive in your practice than ever.

Outstanding features of CEREC® 4.0 include:

- **Multiple restoration design** – Work on as many different restorations as you wish, even in different quadrants and arches
- **Work directly on the tooth** – Execute design tools directly on the tooth, such as adding or removing material, rotating or positioning, or expanding or reducing tooth size
- **Streamlined restoration design** – Move backward and forward without undoing previous design steps

Join CEREC® expert Dr. Darren Greenhalgh for a guided tour through the most exciting development yet in CAD/CAM restorative dentistry.

Speaker: Dr. Darren Greenhalgh

Dr. Darren Greenhalgh is a graduate of the School of Dental Medicine at Case Western University. Upon graduation he moved back home to the Northwest and has recently established a new solo general practice focusing on esthetics in Mill Creek, Washington. Dr. Greenhalgh is a CEREC beta tester for Sirona and has moderated the Puget Sound CEREC Study Club for the past four years. He has lectured internationally on the proficiency of the CEREC restorative process and is a faculty member at the prestigious Scottsdale Center for Dentistry.

Dr. Greenhalgh is also a co-editor of *CerectDoctors* magazine, the only journal dedicated to CEREC dentistry, as well as a consultant to a variety of dental manufactureres to hlep improve their products and design.
