TECHNOLOGY in Dentistry

A seminar with Dr. Robert Conrad

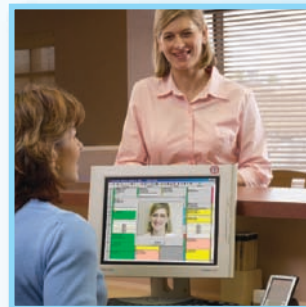

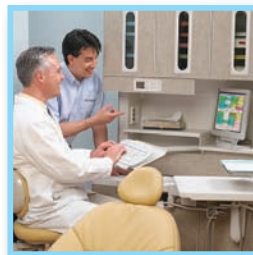

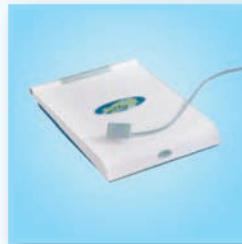

Friday, December 2
Patterson Dental San Antonio Branch

PATTERSON
DENTAL

Wondering if the latest dental technology is right for you?

From digital radiography to single-visit restorations and 3D imaging, dental technology can help you differentiate your practice and increase productivity and case acceptance. This seminar will introduce the latest developments in dental technology and help you make an informed decision about what's right for your practice.

CEREC

- Highly esthetic restorations in a single visit
- Fast, accurate digital impressions – without the mess
- Increased patient satisfaction
- Easy transmission of impressions to lab via CEREC Connect

Cone Beam

- High-resolution 3D images with rapid scan time
- Reduced radiation emission compared to conventional CT
- Enhanced diagnostic capabilities
- Seamless CAD/CAM integration

Glazing Furnace

- Designed to operate with today's high-performance materials
- Small footprint
- Ergonomic design

Laser

- Less-invasive procedure for patients
- Minimizes damage to surrounding tissues
- Wide range of soft-tissue and hard-tissue applications

Digital X-ray

- Precise optical images in three seconds
- Up to 90% less radiation
- No storage and disposal of film and chemicals
- Faster payments with electronic submission of X-rays on claim forms

Caries Scanner

- Earliest possible caries detection, resulting in fewer X-rays
- Unmatched accuracy in detecting both sound and carious teeth
- Simple, intuitive operation and display options

Speaker

**Robert S. Conrad, DDS
Prosthodontic
Specialist**

As a regional CEREC® trainer, Dr. Robert S. Conrad has taught several basic and advanced CEREC training courses throughout Texas. A graduate of the University of Texas Dental School, Dr. Conrad presently maintains a full-time dental practice in Houston and holds associate professor positions with the University of Texas Dental School in Houston and the Olen E. Teague Veterans' Affairs Hospital in Temple, Texas.
