VARIABLE TAPER RECIPROCATING FILE SYSTEM

With controlled memory, VaryFlex One provides a much smoother experience with less 'grab' than other reciprocating systems, and in most cases requires just one file to prepare the canal.

VARIABLE TAPER ROTARY FILE SYSTEM

Thanks to our intuitive design, these files operate much more smoothly than other leading file systems, with less 'grab'. This system is easy to work with - simply follow each file to working length and the ideal shape is created.
