PATTERSON ENDODONTIC ROTARY FILES

NEW

PATTERSON® NITI ROTARY FILES

6/pkg

Patterson® Nickel Titanium (NiTi) Rotary files have radial-landed U-shaped flutes that “lift” debris coronally, allowing for a crown down technique, continuously tapering preparation from orifice to apex. The safety tip design has minimal transition angle to prevent ledging and transporting.

- The best shape for obturation
- A hand file must be used prior to using any rotary instrument
- Safe ended tip
- 13 mm length handle
- Colour-coded bands on instrument define instrument tip size
- Colour-coded silicone stops define instrument taper
