PALODENT® PLUS sectional matrix system

Palodent Plus Sectional Matrix System takes the stress out of Class II restorations by using rings to provide easy, predictable and accurate contacts along with a tight gingival seal. The Palodent® Plus ring tine design helps the system remain stable on significantly damaged teeth. The rings are stackable for multiple restorations at once and will prevent the matrix from collapsing into wide cavities.

TRUSTED EXPERTISE.

ORASOOOTHE® “SOCKIT” GEL is a Health Canada cleared hydrogel oral wound dressing made from only 6 all-natural, non-toxic, food based ingredients

EXTRACTIONS

An estimated **20 million teeth** are extracted every year – making extractions one of the most common dental procedures.^{1,2}

DRY SOCKETS

Up to **38% of third molar extractions can result in a dry socket**, and approximately up to 5% of all extractions result in dry sockets.³ Dry sockets can cause the patient considerable pain and prolong the healing process.
