

3D in Your Practice

PLANMECA and Patterson Dental have teamed up to bring you an exciting new event!

Take advantage of the expertise of three renowned speakers:

- **Chester Wang** – Using 3D Imaging Software
- **Dr. Robert Langlais** – Case Studies: Comparing 2D and 3D Diagnosing
- **Dr. Aaron Molen** – Integrating and Implementing Full-Volume 3D Imaging into Your Practice

Join us at the Westin Crown Center in the heart of downtown Kansas City for a full day of insight into 3D imaging. You'll leave knowing you're prepared to make an informed decision about incorporating this technology into your dental practice.

Chester Wang, President of Dolphin Imaging

Chester Wang is a pioneering member of Dolphin Imaging & Management Solutions and has served as managing director since

1995, helping position Dolphin as a dominant force in the rapidly changing industry of dental-specialty technology. He continues to expand his proficiency in diagnostics and orthodontics with practical training and travel to universities and private practices worldwide. He works with dental-specialty practices to help them effectively use the latest technologies in their daily work flow. Prior to Dolphin, Mr. Wang was a software developer at Xerox and IBM. He received his BS in mathematics and computer science from UCLA. He currently resides in Los Angeles.

Robert Paul Langlais, DDS, MS

Dr. Langlais received his DDS from McGill University and is currently a professor in the department of Dental Diagnostic Science at the University of Texas

Health Science Center at San Antonio. Board certified in oral medicine and in oral and maxillofacial radiology, he has delivered over 300 presentations worldwide and has published 13 first-edition textbooks and more than 80 scientific papers.

Aaron Molen, DDS, MS

An internationally recognized expert on orthodontic technology, Dr. Aaron Molen is a member of the AAO's Committee on Orthodontic Information Technology and

a faculty member at UCLA, where he lectures to the residents on technology and cone beam computed tomography. Dr. Molen is in private practice in the Seattle area with his father and brother.
