More Masterpieces Daily.

Everyday we are working with leading clinicians to elevate the art of dentistry. From prep to polish, we support your artistic creations with instruments created for your hands.

We are dedicated to engineering instruments that deliver efficiencies, such as **Great White**[®] carbides and **Piranha**[®] **Diamonds** to single-step **Jazz**[®] **Polishers**, that mean less chair time for patients and more time for you. Efficiency that is moving more and more smiles everyday.

"I have yet to experience anything that cuts as fast, accurate and smooth as a Great White[®] bur, saving my practice time and money while reducing stress."

- Howard S. Glazer, DDS

SCHICK 33

The Schick 33 sensor is the most advanced sensor on the market, delivering an unparalleled combination of high-resolution imaging and dynamic image management in a modular platform.

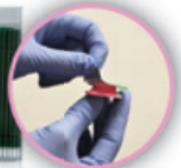

- Image preference presets that give users the ability to save images based on diagnostic needs, from general dentistry to endodontics, periodontics and restorative dentistry.
- User-definable tasks for multi-clinician practices make it easy to change settings according to preference or diagnostic task.
- Three sensor sizes (0, 1, 2) and three cable lengths (3', 6', 9') to choose from.

Introducing A New "Aseptically Manufactured" Articaine

Orabloc™

(articaine HCl 4% and epinephrine 1:100,000
and epinephrine 1:200,000) injection

- Rapid onset of anesthesia within 1-9 minutes
- Complete anesthesia lasts about 1 hour for infiltration, up to 2 hours for nerve block
- Only 10% overage of epinephrine
- A 24 month shelf life at room temperature
- Very low manufacture related degradation products such as articaine acid and epinephrine sulphonic acid
- Sodium edetate free, methylparaben free and latex free
- Each Orabloc™ cartridge is sealed individually in the blister for maximum protection during storage and handling
