The Rock Solid Core Material

- Cuts Like Dentin
- Ideal Consistency
- Outstanding Strength
**NEW ADDED BENEFITS**

- Can be used as a post cement and core material (monoblock)
- Fluoride release
- Radiopaque
- Two shades (white and dentin)
- Choice of delivery systems: 25 ml cartridge and 5 ml syringe

**DUAL CURED**

Light curing allows immediate core preparation, while chemical cure assures complete curing where the light might not penetrate.

**THE ECONOMICAL 5 ML AUTOMIX SYRINGE**

- No dispenser needed
- Small mixing tips, up to 80% less waste compared to cartridge systems
- Automatic mixing and precise direct application
- ParaBond™ Adhesive Free in Introduction Kit

**CUTS LIKE DENTIN**

Preparation bur moves smoothly from natural tooth substance to core material without creating troughs or grooves which are time consuming to repair.

**IDEAL CONSISTENCY**

The non-slumping stackable consistency allows the build-up of the core either free-hand or with the assistance of ParaForm core forms.

**ADDITIONAL BENEFITS**

- Can be used as a post cement and core material (monoblock)
- Fluoride release
- Radiopaque
- Two shades (white and dentin)
- Choice of delivery systems: 25 ml cartridge and 5 ml syringe

**PARAFORM CORE-FORMERS**

- Quick and easy core build up
- Plastic, Disposable, Single Use
- Easy to Place, Cut, Trim and Remove
- Numeric Coding in 10 Sizes
- Included Free in ParaCore Introduction Kit

**STEP-BY-STEP CORE BUILD UP**

1. Application of ParaBond® Adhesive Conditioner.
2. Application of a small amount ParaCore automix to coat the tooth surface.
3. Filling of ParaForm core-former directly from ParaCore automix mixing tip.
4. Placing of Paraform core-former on the tooth.

by PD Dr. Stefan J. Paul, DDS - University of Zurich
GREATER STRENGTH
The ParaCore™ automix material is based on a proprietary formula utilizing proven glass particle technology. These glass particles increase the strength of the core over conventional materials.

**PARACORE™ + PARABOND® = EXCELLENT RETENTION**
Using ParaBond® Adhesive with ParaCore™ provides excellent retention to dentin and enamel, ensuring a long lasting restoration. This bond strength is achieved using ParaBond® Non-Rinse Conditioner with ParaBond® Adhesive. Since ParaBond® is chemical cured, it is ideal for situations where light might not penetrate, such as in post cementation.

**Material Composition**
- Glass Fiber: 60%
- Resin: 40%

**Superior Strength**

The high percentage of uni-directional fibers gives the Fiber Lux post excellent strength characteristics, without compromising flexibility.

**Physical Properties**
- Flexural Strength: 1600 MPa
- Compressive Strength: 630 MPa
### Order Information

**ParaCore automix cartridge**  
**C5855** ParaCore automix Intro-Kit white  
- 25 ml ParaCore automix white, Dispenser  
- 25 ml, 20 Mixing Tips, 20 Intra Oral Tips, 2.5 ml Etchant Gel S, 3 ml Adhesive Conditioner A, 3 ml Adhesive Conditioner B, 10 Assorted coreformers, Accessories

**C5856** ParaCore automix Intro-Kit dentin  
- 25 ml ParaCore automix dentin, Dispenser  
- 25 ml, 20 Mixing Tips, 20 Intra Oral Tips, 2.5 ml Etchant Gel S, 3 ml Adhesive Conditioner A, 3 ml Adhesive Conditioner B, 10 Assorted coreformers, Accessories

**C5853** ParaCore automix Single dentin  
- 25 ml ParaCore white, 20 Mixing Tips, 20 Intra Oral Tips

**C5854** ParaCore automix Single white  
- 25 ml ParaCore white, 20 Mixing Tips, 20 Intra Oral Tips

**C6759** Mixing Tips  
- MT/BROWN/CLEAR/WHITE/43/WITH OT*

**C6555** Oral Tips  
- 100 Intra Oral Tips

**C4470** Dispenser 25ml

**ParaCore automix syringe**  
**C5885** ParaCore automix 5 ml Intro-Kit  
- 2 x 5 ml ParaCore automix syringe white  
- 2 x 5 ml ParaCore automix syringe dentin  
- 1 x 3 ml ParaBond® Non-Rinse Conditioner  
- 1 x 3 ml ParaBond® Adhesive A  
- 1 x 3 ml ParaBond® Adhesive B  
- 20 x Mixing Tips with Oral Tips  
- 1 x ParaPost® ParaForm™ Trial Kit

**C5886** ParaCore automix 5 ml white Refill  
- 2 x 5 ml ParaCore automix syringe white  
- 20 x Mixing Tips with Oral Tips

**C5887** ParaCore automix 5 ml dentin Refill  
- 2 x 5 ml ParaCore automix syringe dentin  
- 20 x Mixing Tips with Oral Tips

**C6759** Mixing Tips  
- MT/BROWN/CLEAR/WHITE/43/WITH OT*

**C7486** ParaBond® Adhesive Refill  
- 1 x 3 ml Non-Rinse Conditioner  
- 1 x 3 ml Adhesive A  
- 1 x 3 ml Adhesive B

**ParaPost® Fiber Lux**  
**One-Office Visit Introductory Kit: PF 170**  
- 2 Posts, size 3, Ø 0.90 mm  
- 1 Drill, size 3  
- 3 Posts, size 4, Ø 1.00 mm
