## PRECISE DETAIL FOR ACCURATE MARGINAL FIT EVERY TIME

- Reliable impressions even in adverse conditions
- Superior hydrophilicity on a polyether level
- Exceptional toughness prevents tearing and distortion

Flexitime provides a better marginal fit than Aquasil Ultra.

In a study conducted by REALITY, restorations fabricated from Flexitime impressions had smaller marginal gaps than Aquasil Ultra.

Impressions were taken on prepared teeth coated with saliva. Source: Reality, October 2009. Sponsored by Heraeus. Data on file.

Superior hydrophilicity on a polyether level for excellent detail reproduction

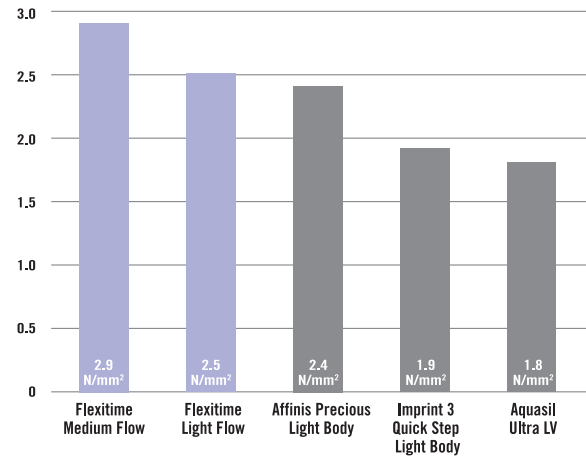

Flexitime offers an extremely low contact angle on a polyether level to capture detail in moist environments.

Contact angle 3 seconds after application on *unseal* impression material.
