Hemostasis and Retraction?
No Problem.

NEW!
traxodont™
Hemodont™ Paste Retraction System

New Traxodont™ from Premier® provides predictable hemostasis and soft tissue management in minutes.

Easy, effective hemostasis and retraction. The sleek syringe with bendable tip permits easy application of Traxodont directly into the sulcus. After two minutes it is rinsed, leaving an open, retracted sulcus.

Traxodont is gentle, absorbent and fast. The soft paste produces gentle pressure on the sulcus while it absorbs excess crevicular fluid. The aluminum chloride creates an astringent effect without irritating or discoloring surrounding tissue. Traxodont provides predictable hemostasis and retraction in less time and with greater comfort.

Try it – starter and value packs are available through your authorized dealer.
Improve your impression making

NEW! Traxodent™
Hemodent™ Paste Retraction System

Quick effective retraction: About 2 minutes - no fumbling with hemostatic solutions - save chair time

Superior hemostasis: Stops bleeding and crevicular seepage while retraction occurs - easily absorbs excess crevicular fluid

Increased patient comfort: Avoid tearing gingiva - less pressure on sensitive tissue

Convenient delivery system: No cumbersome and expensive guns or cartridges - ergonomic disposable syringe and bendable syringe tip provides excellent reach

Maximum freshness: Each syringe is packaged in resealable foil pouches

Excellent value: Ready to use, no hidden cost - kits include syringes and disposable tips

Ordering Information:

- PRTHV  Traxodent Value Pack (25 syringes and 50 tips)
- PRHT  Applicator Tips (50)
- PRTHS  Traxodent Starter Pack (7 syringes and 15 tips)

NEW! Premier® Retraction Caps

Anatomic formed cotton caps work synergistically with Traxodent to quicken and assist retraction and hemostasis.

- Easily guides Traxodent into the sulcus
- Compression assists and quickens hemostasis
- Cotton absorbs fluids
- Anatomic form allows easy placement on adjacent teeth

- PRTRCS  Size 5 (60)
- PRRC3  Size 3 (120)
- PRRC1  Size 1 (120)
- PRRCASS  Assorted - (30) #5, (15) #1, (15) #3

Available after July 15th.

Gentle and effective retraction in minutes!

1. Bend tip for optimal access
2. Position tip parallel to axial plane of the tooth
3. Dispense sufficient material to displace tissue
4. Place Premier® Retraction Cap on tooth structure
5. Have the patient bite and maintain pressure on the cap. Wait about 2 minutes.
6. Rinse away, leaving sulcus open and accessible

Optional Cord Technique
Traxodent eliminates the need for a second cord.

- Place a single strand of retraction cord
- Dispense sufficient material to displace tissue. Wait about 2 minutes.
- Rinse away, leaving sulcus open and accessible
