Safety-Wipes™

Adhesive Foam Wipe for
Hygiene & Endo Procedures

PRODUCT DESCRIPTION

Safety-Wipes™ means improved safety and ease for endo and hygiene procedures: dense foam with adhesive back reduces risk from puncture and messy 2x2 alternatives. Place antiseptic in grooves and use as endo file wipe and holder.

The Problem... Wiping debris and blood off instruments quickly during a procedure without puncturing a gloved hand or picking up fibers from gauze. Hand stress from clenching gauze.

The Solution... **Safety-Wipes™** were developed to reduce hand stress and facilitate procedures when working unassisted. Adhesive back adheres easily to glove or bib. Improved density of foam means protection from punctures. Ideal as endo file wipe and holder too; add antiseptic to the grooves!

FEATURES

Dense foam construction

Adhesive back

**U.S. clinician developed
and manufactured**

BENEFITS

Protection from puncture wounds

Ease of use; adheres to gloved hand, bib or tray

Dependability
