

Which do **you** prefer?

This?

Or that?

Courtesy of Dr. Mark Pitel

AMALGAM

- Currently banned in Denmark, Norway & Sweden and in Costa Mesa, CA there is resolution for dentists to voluntarily switch to non-toxic alternatives†
- Additional states are requiring use of amalgam separators for waste
- Shade - metallic with zero translucency
- Requires additional tooth preparation
- More recurrent caries with amalgam

EQUIA™

- First self-adhesive posterior restorative system
- Apply EQUIA™ Coat for a permanent restoration in any size Class I & smaller Class II cavities*
- High esthetics (eight shades) & translucency
- Maturation hardens (strengthens) over time
- Great for high caries risk patients

EQUIA™

Bulk Filled, Self Adhesive Esthetic Posterior Restorative System
