

## Introducing the Queen of Hearts™ R144

Research has confirmed people with periodontal disease are twice as likely to suffer from cardiovascular/ cerebrovascular disease. This 'Oral-Systemic Connection' is now better understood. Hygienists are the first line of defense against these diseases. The Queen of Hearts™ periodontal curette has long fine cutting edges for finishing with a completely smooth surface when root planing, bringing your patient one step closer to better overall health.

*For every Queen of Hearts purchased, PDT will make a donation to the American Heart Association.*

*"This is the sharpest curette I have ever used. The tip is outstanding for removal of granulation tissue and calculus in molar furcations." Dr. Robert Horowitz, Periodontist NYU College of Dentistry, Departments of Implant Dentistry, Periodontics and Oral Surgery; Private Practice, Scarsdale, NY.*
