LOW PROFILE NASAL MASK

Change your view of nitrous oxide.

www.porterinstrument.com/silhouette
Designed By A Dentist To Make Nitrous Oxide Easier To Use

SILHOUETTE is the brainchild of Robert Guyette, D.M.D., M.D., an Oral and Maxillofacial Surgeon in Phoenix, AZ. Dr. Guyette recognized that the available nitrous oxide masks made it difficult to access the oral cavity during dental procedures and were oftentimes uncomfortable for his patients. His extensive research led to an ingenious solution; an anatomic, low profile, lightweight mask that fits comfortably over the patient’s nose providing excellent access to all areas of the patient’s mouth.

Description

SILHOUETTE is a single patient use nasal mask and breathing circuit designed with lightweight tubing and a comfortable and conforming mask.

Features And Benefits

SILHOUETTE’s unique design offers many advantages over traditional nasal hoods, including:

- Unobstructed access to the oral cavity
- Adhesive strip secures mask in place
- A more predictable nitrous experience
- Disposable mask/circuit for improved infection control
- Enhanced scavenging efficiency for reduced N2O exposure
- Four sizes for a perfect fit on all patients
- Easily retrofits to most flowmeters
A Comfortable Fit For All Patients

The Silhouette mask is available in 4 sizes: Pedo, Adult Small, Medium and Large resulting in a perfect fit for all of your patients.

Scavenging Efficiency

Visit Porter’s website to view infrared imaging videos demonstrating scavenging efficiency.

Adhesive strip secures mask in place.

Specially engineered nasal cannula for patient comfort and effective N2O delivery.

Capnography Luer Lock on every circuit for convenient sample line connection.
