

Expected Benefits

For over 25 years, Mexpo has been providing high-quality examination gloves to professionals. Now, we proudly present to you our latest products – **BLOSSOM®** Powder Free Latex and Nitrile Examination Gloves with C.O.A.T.S. (Colloidal Oatmeal Systems).

The composition of colloidal oatmeal contributes to its moisturizing, protective, cleansing, anti-oxidative, and anti-inflammatory properties.

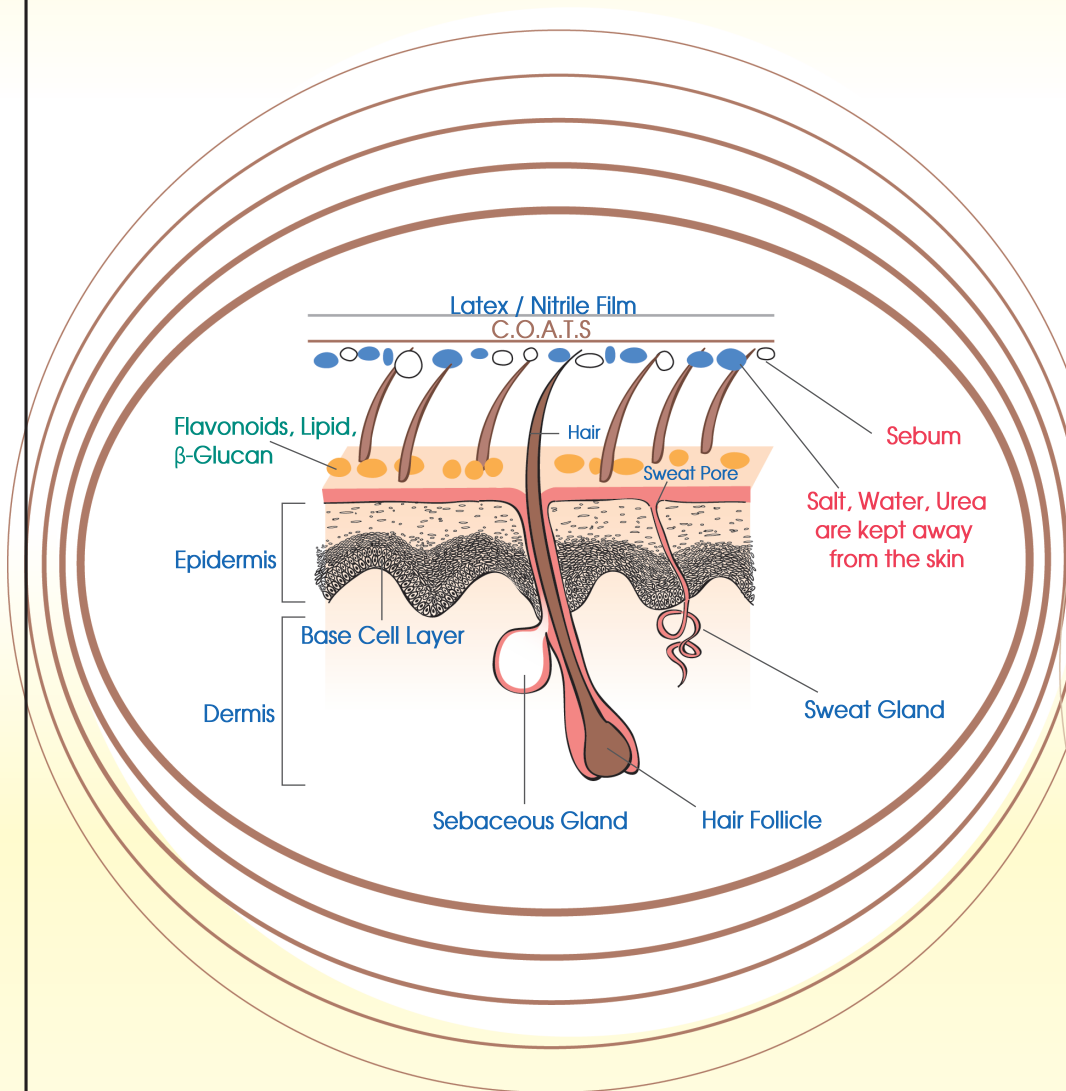

β -Glucan – a key component in oatmeal – helps form a physical barrier between the skin and the glove. This layer will absorb harmful materials such as salt and urea while keeping your hands moisturized. In addition, anti-irritant and anti-inflammatory components of the oatmeal will provide relieve to minor irritation.

These beneficial components are integrated into the coating on the inside of our gloves.

As a result, the gloves naturally moisturize the users' hands, minimize direct irritation, and provide users a comfortable experience.

Most importantly, the **BLOSSOM® Powder Free Examination Gloves with C.O.A.T.S. will provide the protection, the care, and the silky touch your hands have been yearning for!**

For additional information or samples, please contact blossomglo@aol.com

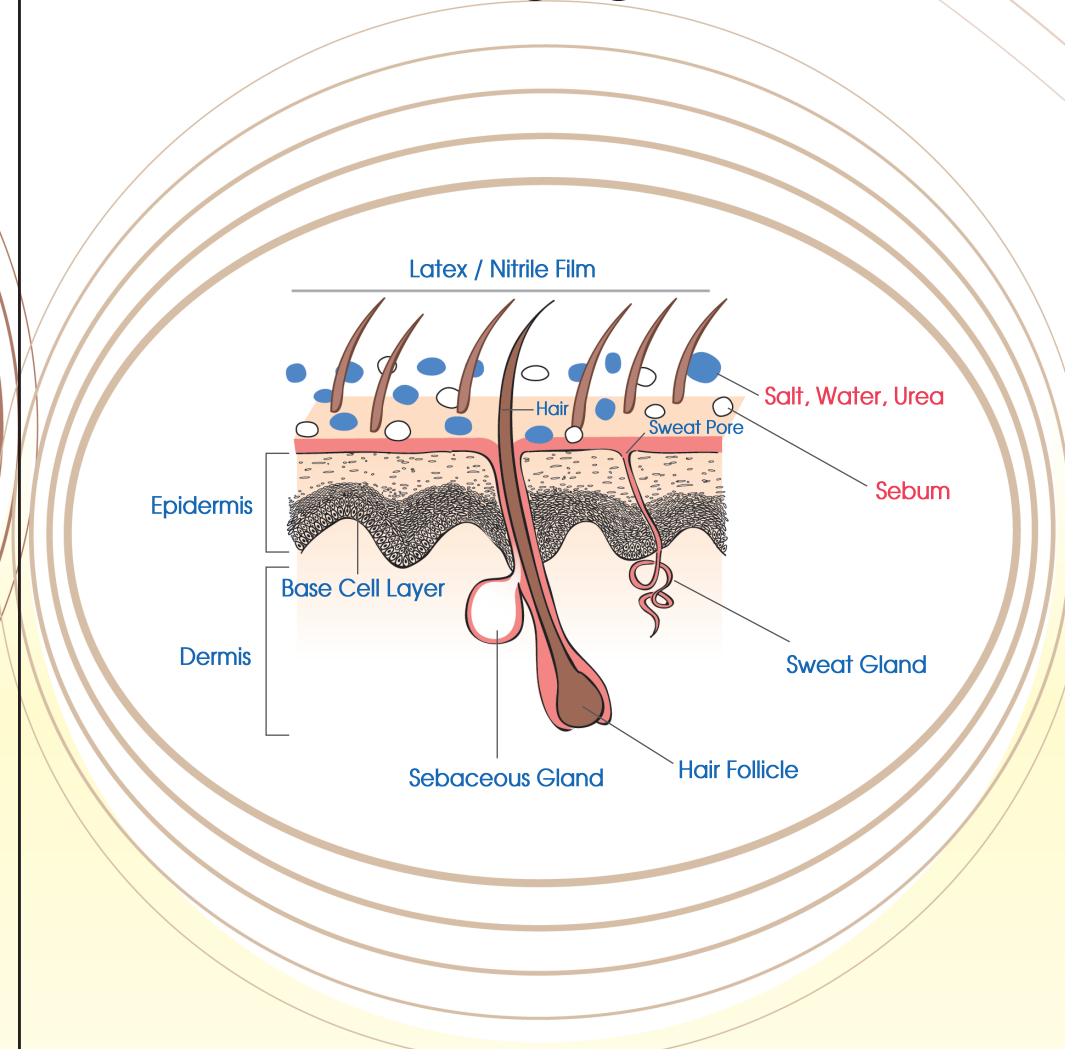

The Blossom® Powder Free Examination Gloves with C.O.A.T.S.™ provide users a comfortable and soothing experience by:
