

*Rediscover
Soft Liners.*

NEW
Preference
Soft DENTURE LINER

Bring comfort back to dentures with the new Preference Soft denture liner system. It's incredibly soft yet incredibly strong.

Rediscover:

- A soft liner with natural-like feel to denture fit
- A soft liner that snaps up and around the ridge, even uneven ridges
- A soft liner that provides a long-lasting, soft cushion
- A soft liner that provides a strong seal to protect against delamination
- A soft liner that is ideal for new, rebased, and relined dentures

Incredibly Soft:

Shore A Hardness

24 Hours	2 Years	4 Years
30.1	31.3	29.5

The Shore A Hardness value for soft liners after 24 hours of aging should range from 25 to 50 units¹. The lower the Shore A Hardness value, the softer the liner.

Water Sorption / Water Solubility

Sorption	Solubility
6.0 mg/mm ³	0.899 µg/mm ³
Significantly better than specified limit of less than 20 mg/mm ³ .	Significantly better than specified limit of less than 3 µg/mm ³ .

High sorption and solubility of soft denture liners are associated with swelling, distortion, hardening, absorption of odors, support of bacteria, color changes, and debonding.

Incredibly Strong:

Peel Strength Test
Avg. 19.51

Peel strength is a measurement of the strength of the material and its resistance to tearing. Researchers believe that for softer material, the lifting force may be more likely to deform the soft lining elastically and leave the interface area intact¹.

Incredibly Easy:

Working Time	Unattended Processing Time	Finishing Time
15 minutes	14 hours	30 minutes

Products:

Preference Liner Intro Kit, Item 20011930

Includes 4 oz tube of liner, 15 mL primer with brush, 12 finishing fiber wheels, and 3 mandrels.

Preference Liner, Item 20011860

Includes 12 oz liner tube and instructions

Preference Primer, Item 20011870

Includes 15 mL bottle with brush

Preference Pressure Pot, Item 20011920

Includes pressure pot with range up to 80 psi
