

ALL NEW IN 2020

Midwest® Rhino XE™
Low Speed Air Motor

Shorter. Faster. Easier.

Motor shown actual size.
Overlay your current motor
for comparison.*

Shorter motor length designed for smaller hands and improved ergonomics.

Faster — 20,000 RPM — for quick appliance adjustments and optimal restoration polishing speeds, with reversible direction.

Easier, universal e-type connection allows rapid attachment changes with a wide variety of attachment options.

*Call your Restorative Midwest Specialist
at 800-800-2888 to
schedule a demo today.*

Motor and single-piece attachments
precision made in Bensheim, Germany.

*Shown actual size (subject to printing variations).
Rhino XE motor body is 20mm diameter x 40mm long.
