

Mobile ACLS V2

EMERGENCY MEDICAL KIT

For oral surgeons and dentists performing IV sedation
HealthFirst will ensure your medications are always up to date

Mobile solution for life-saving care

The Mobile ACLS V2 Emergency Medical Kit helps enable a rapid response for advanced cardiac life support (ACLS), pediatric advanced life support (PALS) or basic life support. The medications and devices are appropriate for a dental office practicing IV sedation and are well organized in separate compartments. The kit can also carry an oxygen tank and an AED, making it a mobile solution for life-saving care.

Always up to date

HealthFirst's Auto-Replenishment Service takes the guesswork out of staying up to date. The service uses smart automation to track the expiration dates of medications and devices and automatically replenishes them before expiration. Practices benefit by maximizing the shelf-life of medications, lowering costs, saving time and gaining peace of mind.

OnTraq

OnTraq, HealthFirst's practice readiness application, reduces the risks, headaches and costs of emergency preparedness and regulatory compliance. It dynamically shows the status of your emergency medical kit and medications. Rely on OnTraq's smart automation for dashboards, reports and task management.
